ABOUT ME

I am Job Sunday Owonubi, a Nigerian male software specialist with a Bachelor's Degree in Computer Science from the University of Ilorin. With a strong background in software development, I have been instrumental in various projects, including leading the backend development of various projects, managing retail software using Python/Django, refactoring APIs, and revamping an E-commerce app with Dart/Flutter. My passion for programming and technology research, particularly in AI, drives me to continually innovate and deliver high-quality solutions. Beyond my professional endeavours, I have a love for music, playing instruments, and football, both as a player and an enthusiast

WORK EXPERIENCE

COMMUNICATION AND INTERPERSONAL SKILLS

Collaborative Team Player

In my previous roles as a Software Solution Specialist and Back-end Developer/Lecturer, I have demonstrated strong communication and interpersonal skills that have enabled me to work collaboratively with other team members. I am an active listener, which helps me to understand different perspectives and contribute to group discussions effectively. I also value constructive feedback and strive to use it to improve my work and help others do the same.

Client-Focused Communicator

As a Lead Backend Developer for a chargeback portal and Logistics System, I have experience working with clients and understanding their needs. I possess excellent communication skills that allow me to build strong relationships with clients, ensure that project milestones are met, and deliver a high-quality end product. I am able to explain technical concepts in simple terms to non-technical stakeholders and provide clear progress updates to clients.

Adaptable and Positive Teammate

In my role as a Joint Developer for a logistics app and a Lead Developer for a student management system, I have worked with diverse teams, adapting to their different working styles and personalities. I am a positive and approachable team player who thrives in a collaborative environment and contributes to a positive team culture. My ability to quickly adapt to changes, take on new challenges, and remain optimistic in the face of setbacks makes me an excellent addition to any team.

Adaptability and Flexibility

As technology is constantly evolving, it's essential for professionals in this field to be adaptable and flexible to new tools, technologies, and processes. I have demonstrated his ability to adapt to new environments and learn new technologies quickly. This required strong communication skills to ask questions and seek clarification when needed, as well as the ability to work collaboratively with team members to integrate new tools and processes into existing workflows.

HOBBIES AND INTERESTS

Programming

As a software solution specialist with experience in back-end development, mobile app development, and database administration, programming is not just a profession for me but also a hobby. I enjoy exploring new programming languages, experimenting with different coding techniques, and finding creative solutions to problems.

Music

Whether it's playing an instrument or listening to my favourite songs, music is a passion of mine.

Technology Research

I have a keen interest in keeping up-to-date with the latest developments in the tech industry and enjoy researching technologies such as artificial intelligence.

Sports

I am an avid football fan, both playing (to keep fit) and watching. I enjoy playing football with friends and colleagues, and also enjoy watching live matches.
